A contour plot titled "CONTOUR PLOT" showing wind speed (m/s) on the x-axis (ranging from -20 to 20) and range (m) on the y-axis (ranging from 0 to 2500). The plot displays several closed contour lines, indicating regions of constant wind speed. The contours are most prominent between 0 and 10 m/s, with a notable elongated region of high wind speed (around 10 m/s) extending from approximately 1000 m to 2500 m range. Other contours are visible at lower ranges, particularly between 0 and 5 m/s.
